

Continuous Autonomous AI Auditor

Take advantage of our [risk-free, 100% complimentary test drive](#). Give us 30 charts for an AI Auditor review and get ready to bear witness to the power, accuracy, and financial results it can bring to your organization.

AI Auditor is a Game Changer

Hospitals can realize an 84% increase in charts reviewed pre-bill by utilizing the same technology payers employ to deny, delay, and downgrade claims for medical necessity and clinical validation!

More Benefits to Using AI Auditor

CORE CDI AI Auditor is perfect for proactive denial prevention. Minimize revenue loss by identifying and addressing potential issues before submission.

- **Predictive Data-Driven Decision Making:** Our analytics provide actionable insights that allow healthcare providers to proactively manage and mitigate risks associated with claim denials.
- **Proactive Physician Education and Feedback:** Personalized feedback to physicians with recommendations for improving documentation practices, focusing on specific areas of deficiency.
- **Preemptive Higher Compliance and Reduced Audit Risk:** Through audit-ready documentation, AI Auditor helps to ensure that all claims and documentation are audit-ready, reducing the stress and resource drain of potential audits.

How AI Auditor Works

- Powered by a sophisticated payer-specific rules engine that closes the gap identifying charges that will deny medical necessity and clinical validation from the payor perspective.
- Ensures that claims are not only coded correctly but also fully supported by clinical evidence, reducing discrepancies, and improving overall accuracy.
- Drills into the underlying clinical details, cross-referencing the documentation with 837 files to uncover potential red flags that scrubbers often miss.
